

REBUILD IT EASY. REBUILD IT RIGHT.

SEALED POWER® Engine Kits, featuring Fel-Pro® Gaskets

Sealed Power® Engine Kits include everything needed for a top quality, long-lasting rebuild, one that no other engine kits can match. Each kit includes 100% Sealed Power engine components and premium quality Fel-Pro® gaskets, the industry's #1 brand of gaskets.

With over one million Sealed Power Engine Kit combinations available, you can get everything you need to rebuild your engine right!

Sealed Power Engine Kits feature:

Sealed Power A-Series® Engine Bearings

Sealed Power A-Series® engine bearings feature the latest in bearing technology. With reduced engine noise, improved oil flow and maximum peak load capacity – plus the ability to exceed 150,000-mile durability thresholds – Sealed Power A-Series® engine bearings match the operating demands of today's engines.

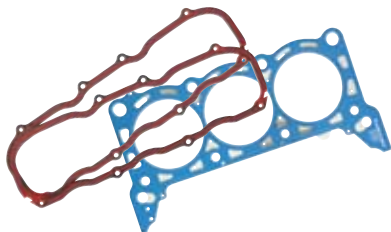

Sealed Power DUROSHIELD® Pistons

Sealed Power DUROSHIELD® hypereutectic and POWERFORGED® pistons feature friction-reducing moly-graphite coating, scuff-resistant proprietary alloy, and T-5 heat-treated strength.

Sealed Power Rings

Sealed Power piston rings provide greater oil-carrying capacity that enables them to withstand extreme engine temperatures without scuffing.

Fel-Pro Gaskets

The Fel-Pro gasket set included in Sealed Power Engine Kits provides sealing solutions for virtually every engine repair. Gasket set upgrades are also available that include problem-solving Fel-Pro PermaDryPlus® and PermaTorqueMLS® sealing technologies, both designed specifically for the repair environment.
